Milestones

What do YOU want to gain from GitHub

Milestones

- Let you:
  - Define requirements, big or small and track their progress. Set due dates and tag members of your team so they are informed of their responsibilities.
  - Quickly see the progress of your team in a dashboard like view.
  - Organize goals in bite size chunks, so progress and synergy is created in your team.

⊙ Issues

- The main place for communication on GitHub.

- Discussion threads generally centered around one topic.

- Issues can be used to communicate bugs, features, questions, or to address project requirements.

Add instructions for gitpod #153   New issue

🟢 Open   christophertubbs opened this issue on Aug 25 · 1 comment

---

christophertubbs commented on Aug 25   Member 🙂 •••

Since NGen is being initially targeted for unix machines, developing on windows can be troublesome. A workaround for this is gitpod. Gitpod isn't perfect, but can provide a space to develop, build, and run NGen from a convenient location.

Instructions for how to get started should be added to the contributing documentation and possibly the readme.

🏷 **christophertubbs** added documentation good first issue labels on Aug 25

christophertubbs commented 16 days ago   Member Author 🙂 •••

I tinkered around with gitpod earlier today to try and work out some issues occurring in ubuntu but not mac. I could compile because I couldn't find boost. It looks like a custom docker image may be needed for the gitpod environment.

hellkite500 commented 7 days ago   Member

Fixes counting logic for required parameters and validation.

Closes #171

Changes

- `FormulationManager.hpp` make `get_required_parameters()` return a `const std::vector<std::string>&` instead of a `std::string*`

- Update all existing formualtions to store `REQUIRED_PARAMTERS` as a vector of strings instead of a pointer of strings
